STAR WARS™ BUILDING STEPS

T-22 ARMORED AIRSPEEDER!

The Republic T-22 armored airspeeder is a fast single-pilot repulsorlift vehicle designed to fly in close, blast Separatist ships and droids with its four rapid-fire turbolasers and concussion missile, and then escape to make its next attack run. With a skilled pilot at the controls, a T-22 moving at full speed is almost impossible to hit.

Build this model using elements from the 7675 AT-TE Walker™!
